-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

The amendment received 18 September 2007 has been made of record. Claims 1-4 are pending.

The objections to claims 1-4 contained in the previous office action are withdrawn in view of applicants' arguments.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by JP '816 abstract.

JP '816 (abstract) discloses reduced birefringence transparent polymeric materials suitable for optical applications. These materials are taught as comprising oriented polymer and granules of size less than the wavelength of light which compensate for the orientation birefringence of the polymer. These granules are taught as acting in a similar fashion as those of the instant claims.

Applicants' reference to "caked after flowing" is seen as a process step in the product claims and, therefore is not seen as imparting patentability without a showing of patentably distinct properties flowing therefrom.

Claims 3 and 4 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over JP '816.

JP '816 (abstract) is discussed above. The abstract fails to explicitly recite flowing and caking steps. Until such time as the examiner can access a complete

translation of the '816 document, it is assumed that the reference discloses flowing and caking.

In the alternative, it would have been obvious to one of ordinary skill in the art to use melt flow techniques to orient the polymer and blend granules with polymer in order to achieve the desired properties of the composition and articles.

Applicants are requested to provide to the examiner a full translation of the '816 document.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Edward J. Cain whose telephone number is (571) 272-1118. The examiner can normally be reached on M-F, 10:00-6:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David Wu can be reached on (571) 272-1114. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
